

JANUARY HIGHLIGHTS

Our very bzzzzzzzy 2nd graders have been working hard in the computer lab on their Bee PowerPoints. Each child researched a different species of bee and created a 15 slide

presentation complete with pictures, animations, and transitions! We spent the week after Christmas break teaching each other about the many varieties of bees there are in the world as well as the important contributions they make by helping plants grow, breed, and produce food.

The technology focus this month for 5th grade is coding! We began by learning about algorithms and then "programming" a "computer" to make a tomato & mayonnaise sandwich! Students were amazed at how much logic and problem solving is needed when it comes to learning how to code! Our respect for computer programmers grew exponentially!

7th Grade created gorgeous paintings on sheet paper canvas representing the Four Seasons. When placed all together they are truly striking!

PreK works hard on their upcycled juice bottles turned snowmen! They had a lot of fun and helped the environment at the same time!
