

FEBRUARY HIGHLIGHTS

It's all about STEAM (Science, Technology, Engineering, Art, Math) in the tech lab for the next five weeks!

PreK thru 2nd began our unit by learning the science behind turning a liquid into a solid. What better (and more delicious!) way to learn this lesson than by making homemade BUTTER!

3rd Grade is learning the binary code alphabet by "coding" St. Mary's School in beads!

And 6th Graders are putting their engineering and math skills to valuable use by creating Medieval Siege Towers!

3rd grade using their knowledge of forces, gravity, and speed to build and race hovercrafts!

Mrs. Kenneson, Middle School Language Arts and Social Studies Teacher dressed as Teddy Roosevelt, to help 8th Grade learn about World War I.

Student Council sponsored a Coin Drive for the Esther School, a school in Africa that St. Mary's supports, and raised \$565.03!

All Art classes worked with a variety of mediums in February!

St. Mary's celebrated Catholic Schools Week, and highlighted our Priests and Deacons at Morning Prayer.

8th Grade held their annual play, and this year they performed “The Lion King”. They received rave reviews!
